Pics2DVD.com Launches Photo Scanning, Preservation and Restoration Services for Pre-Digital Photos and More

JACKSONVILLE, Fla. (October 24, 2011) — Pics2DVD.com announces the launch of nationwide digitization services for the state-of-the-art scanning, restoration, and preservation of pre-digital photos, negatives, print memorabilia, scrapbook pages, and photo slides.

“We are proud to open a new business that provides photo enthusiasts with options to preserve older photographs in an affordable digitized format. We can scan pictures, slides and negatives to a CD, DVD or flash drive, as well as restore faded or damaged photos, scan important memorabilia, and provide online storage and organizing services as needed,” said Rami Rawdah, President of Pics2DVD.com and a document imaging professional.

“We have a variety of specials, packages and discounts for our clients to customize their order. We can quickly and safely scan boxes filled with older personal prints from weddings, family and class reunions, births, vacations and more, and package these memories and lifelong events into digital formats to organize and preserve them for generations. And, family scrapbooks, photo albums and other memorabilia can easily be scanned for duplication and sharing,” said Monica Bernhardt, Executive Director of Pics2DVD.com and a professional organizer.

Bernhardt and Rawdah established **Pics2DVD.com** when Bernhardt recognized the challenges that homeowners experienced in the organization of their non-digital photos that had been accumulating in boxes over the years. “Rami and I discovered that with ImageStorehouse’s digitizing expertise, we could provide a valuable service to photo enthusiasts all over the country who want to preserve their older, worn or damaged personal photos in a current digitized format. This takes up much less space and is more convenient for sharing online and with others,” said Bernhardt.

Rami Rawdah is President of Pics2DVD.com and CEO of ImageStorehouse, which provides comprehensive, all-inclusive Electronic Document Imaging and Management Systems and Services for multi-national corporations, government agencies and privately-held businesses throughout North America.

Monica Bernhardt is Executive Director of Pics2DVD.com and founder of ToDoers.com, providing organizational and event-planning services to esteemed clientele throughout Jacksonville and the regional Southeast. She also is Executive Director of The Harvey Bernhardt Foundation, a non-profit organization that provides assistance to families in need.

Pics2DVD.com provides the latest technology in digitization services for the scanning, restoration, and preservation of pre-digital photos, negatives, print memorabilia, scrapbook pages, and photo slides.
